NEWS RELEASE NO. 83, DECEMBER 2007

Since 1982 *Share International* magazine has published monthly articles by a Master of Wisdom. Far from being mystical or remote, Benjamin Creme's Master often addresses the immediate problems facing humanity.

His latest article, printed below, calls again on humanity to tackle the escalating environmental problems that endanger the world: "*Man has but little choice: the urgency of the task demands immediate action; few indeed realize the true scale of damage already done.*"

The Earth in travail

It may be said that at last some men are beginning to take seriously the dangers posed by global warming and the consequent climate changes that this is bringing about. It is true that there is much disagreement over the reality and extent of the dangers, and of the best means of approaching the problems which are agreed to exist. However, there is no doubt that some men, at least, are recognizing that men face a formidable task in halting the progress of destruction and in stabilizing the environment. It is also true that even the most aware and concerned of men know little of the extent and complexity of the problems.

The problem of pollution is such a case. Pollution takes many forms, some obvious and easily dealt with, if the will to do so exists. Some, however, require a science and a remedy as yet unknown to man; they are so toxic and destructive that they must be given high priority to overcome. The effect of pollution on the quality of air, food, on animals, and on fish, in rivers and the oceans, is known but largely ignored. The most destructive of all, that caused by nuclear radiation, awaits discovery by Earth scientists. The upper levels of nuclear radiation are beyond the present atomic technology. They are also the most toxic and hazardous to man and the lower kingdoms. On all those levels the problems of pollution must be overcome. This can be achieved only by a complete reconstruction of the present political, economic and social structures.

Ravaged

Man has ravaged and polluted the Earth, and severely damaged his own environment. Now man

must see it as a top priority to remedy what he has hurt and so restore to health his ailing planet. He must learn to simplify his demands on the planet and learn the beauty of simplicity and the joy of sharing.

Man has but little choice: the urgency of the task demands immediate action; few indeed realize the true scale of damage already done. The question may be asked: can planet Earth be saved and by what means?

The answer is a resounding YES! and by means which involve the transformation of the present modes of living by the majority of men.

The paramount ambition of all so-called 'developed' countries is to achieve an ever higher percentage of growth of their economies to become, thereby, richer; and, in an economic world based on competition, to attain dominance and power, and so enjoy a higher standard of life. This being so, the pillaging of the Earth, the cavalier waste of resources, is seen as only natural and necessary. This irresponsible action has at last brought planet Earth almost to its knees.

Urgent

Maitreya, you can be sure, will not be long in addressing this urgent problem and in presenting His solutions. The first step, He will advocate, is the acceptance of the urgency which many today deny. Sharing, He will say, is the beginning of the process of change which will provide the answers to our woes and the rehabilitation of Earth.

(*Share International* November 2007)

“Wake up, mankind!”

“It will soon become clear that without help men have but little time to rectify the problems, ecological, political and economic which cause chaos, danger and heartache to the majority of Earth’s people. It is a situation unique in Earth’s history. Much depends on men realizing that they have, as custodians, the responsibility to tend carefully the well-being of the planet and all its kingdoms, and to pass on a vibrant, healthy planetary home to future generations. So unhealthy has the planet become from man’s predatory action and cavalier neglect, that, were it human, grave doubts of its recovery would be in order.” (SI Sept 2006)

“Men must see themselves as One. The old barriers to freedom and justice must be discarded; all must share in the Earth’s bounty; all must learn the language of trust. Planet Earth, our home, must be nursed back to health, its air, soil and waters purified, made safe again for man.

These are the urgent requirements for the stabilization of the Planet and the health of its inhabitants. Once adopted, there will be no return to the disorder of the past. Man will part company with poverty and war, exploitation and cruelty, corruption and injustice. Men will emulate their Elder Brothers and walk the path of Love and Peace.

See this time as the time of Decision. All rests on man’s response to Maitreya’s counsel.” (SI July/Aug 2006)

“Men must realize their responsibility for the planet on which they live. Stewards, men are, of a strong but sensitive organism and must protect it from harm. Few, today, can claim that this they do. On the contrary, men waste and ride roughshod over nature’s generous munificence, unheedful of tomorrow or their children’s needs. True it is that many are awakening to this problem, but until it is understood as the concern of all, and tackled globally, little progress will be made in changing direction.

You can be sure that Maitreya is not unmindful of the dangers to mankind if they ignore this pressing difficulty. He will urge men to work – everyone – for the planet’s restoration, and point the way to a simpler and happier life.

Once restored again to health the planet will continue to give its bounty to all who approach with care and love. The elementals of the lower kingdoms know well their tasks; free from the influence of men’s disordered thoughts, these industrious builders can, in harmony, create a new and better world.

When men understand nature as the Great Mother of all, they will approach Her with reverence. Thus will She reveal to men Her secrets and laws. Armed with this new knowledge, men will in truth manifest as Gods.” (SI June 2001)

“If men were to see the state of the world as We, the Masters, see, they would be amazed, dumfounded and afraid, all at the same time.

So far from the reality is man's view of conditions on Earth, and so lacking in judgement is he about future possibilities, that, without help, man would watch his planetary home languish and die.

As it is, planet Earth is in a sad and perilous condition while each day brings it nearer to the critical. Many voices have sounded warnings on global warming, and many views have been expressed, but even the most dire prophecy falls short of the calamity facing the world today. ...Great as is the peril posed by global warming, this, unfortunately, is not the greatest, or most hazardous, faced by man today. Did he but know it, man is engaged in a slow but steadily increasing intoxication of the race and of the lower kingdoms. Toxicity, pollutions, of all kinds, and in all fields, is now the greatest danger to men, animals and the Earth itself. All are poisoned and sick in their own way.

Unknown to men but evident to Us, the greatest harm sustained by men and planet in this sorry tale is caused by nuclear radiation. Men have gone far astray in the development of this most dangerous energetic source. Led astray by greed, and the false hope of vast profits, they have concentrated their experiments in 'taming' the most dangerous source of energy ever discovered by man, neglecting, meanwhile, a perfectly safe alternative use of the energy of the atom. Atomic fusion, cold and harmless, could be theirs from a simple isotope of water, everywhere available in the oceans, seas and rivers, and in every shower of rain ... Wake up, mankind!" (SI June 2006)

“When the Earth is viewed as a living entity,

complete in all its parts, each essential to the Whole, a new vision and a new sanity will prevail. Men will come to see themselves as stewards of a natural order, preordained to function in harmony and beauty, each kingdom related, above it and below it, according to the Plan.” (SI Dec 1985)

“The early signs of a new global consciousness

can be seen as men realize the need for co-operation in dealing with their environmental problems. This augers well for the future and shows correct response to a major danger facing the race: unless the damage now being done to the environmental balance of the planet is quickly restored, the life expectancy of many will dramatically decrease. No one, rich or poor, is totally free from this insidious breakdown of the human immune system. Men tamper with that system at their peril.” (SI Nov 1998)

“Maitreya will turn the minds of men

more urgently to the ills of planet Earth, itself. Without a healthy and robust planet the future of succeeding generations is in peril. Maitreya will stress the urgency of action now to restore equilibrium to our suffering planetary home, and call all hands, old and young, to this primary task.” (SI Oct 2006)

Share International — background information

For over 30 years artist, author, and lecturer Benjamin Creme has been preparing the way for the biggest event in history — the emergence of Maitreya the World Teacher and His group, the Masters of Wisdom. Millions of people around the world have heard his information and wait expectantly for this momentous event.

Since 19 July 1977 Maitreya has been living in the Asian community of London, gradually emerging before the public. Long awaited by all faiths under different names, Maitreya is the World Teacher for all people, religious or not.

Maitreya's 'roving ambassador' Benjamin Creme travels the world spreading his message of hope and creating a climate of expectancy for Maitreya's emergence. Trained and supervised over many years by his own Master, with whom he is in constant telepathic contact, Benjamin Creme has access to up-to-date information on Maitreya's emergence, giving him the total conviction needed to present this story to a sceptical world.

As a modern man concerned with today's problems, Maitreya works behind the scenes of our changing world. The outpouring of His extraordinary energy has been the stimulus for dramatic developments on many fronts: the ending of the cold war; the break-up of the Soviet Union; the unification of Germany; the ending of apartheid in South Africa; the growing power of the people's voice, leading to demands for freedom and justice; and the worldwide focus on preserving the environment.

Outwardly Maitreya has met with influential leaders from all fields, informing them of His solutions to our pressing problems. His message can be summarized as: "Share and save the world." He has not come to found a new

religion but as an educator in the broadest sense. He will seek to inspire humanity to see itself as one family, and to create a civilization based on sharing, economic and social justice, and global co-operation.

For those who seek signs of His coming, Maitreya has manifested miracles

worldwide, touching the hearts of millions and preparing them for His imminent appearance.

With Maitreya and His group working openly in the world, offering Their guidance and teachings, humanity is assured not only of survival but of the creation of a brilliant new civilization.

According to Benjamin Creme, we do not have long to wait to see Him. Soon, Maitreya will be interviewed on major US television and His open emergence will begin.

Benjamin Creme regularly lectures worldwide, and appears on television and radio — in the USA alone he has been interviewed on more than 700 radio and television shows. He is author of 12 books — translated into 11 languages — and is editor of *Share International* magazine which circulates in 70 countries. He receives no payment for any of this work. Benjamin Creme offers a positive view of the future — a message of hope for the world.

Maitreya's miraculous appearance to 6,000 people in Nairobi, Kenya, 11 June 1988

BENJAMIN CREME LECTURE

THE EMERGENCE OF MAITREYA THE WORLD TEACHER

Friends House, 173 Euston Road, London NW1 (opposite Euston station)

Tuesday 4 December 2007 from 7 to 9.30pm (doors open 6.30 — admission free)

Share International, PO Box 3677, London NW5 1RU
